It's a free name play that took me a few days to really get a handle. I've spent some time with the game since its debut and learned a few things. Now I will be passing these tips on to you. Booty Farm is an adult-oriented Farmville-style game. In a way, it's like a hilariously perverse version of Harvest Moon or Stardew Valley, too. You have inherited a family farm and you will have to improve things as is typical in these kinds of games. That little less wealth of hotties living in the area. Throughout this Booty Farm guide, you'll learn what to do and what not to do. Some things may not be clear until you are way into the game and this guide will hopefully equip you to make the right decisions. Booty Farm Guide - The Basics of Booty Farm is all about producing goods to deliver to women in the city. Simply put, you will plant crops. These crops will be used to produce goods. Then you send a mixture of goods and crops to women in the city. These ladies will pay you with experience, gold, and increase level of relationship. There are certain visual novels novels fight with, too. Girls will ask you questions and sometimes ask you to remember certain facts about them. HuniePop style. You get a sexy photo from a woman after creating a relationship on a certain level. This is the main hook of the game aside from the gameplay. It seems pretty simple, but there's little more than just that. Booty Farm Guide - How can farms can't do the Booty Farm Guide, let alone agriculture, can we now? Agriculture of crops and goods is a relatively simple matter. Plant the harvest, wait for the right amount of time and burn it. You get two harvests for each one you plant; these growth rates correspond to all types of plants in the game. Animals are a little more complicated. First, you will need to create food in the feed factory. The feed is made in batches of 2 units and 1 unit is necessary for feeding the animal. Once the animal is fed, they will produce good ones like eggs, bacon or milk. These products can be sold or used in the production of more complex products. Producing more complex products requires specialized buildings that you can purchase. For example, a juice bar allows you to turn fruit into juice. Some of these products require simple ingredients, but some of these products will require multiple layers of crafting. For example, to prepare a watermelon salad will require the following: the harvest of watermelon grow corn and lettuce. Use corn and salad to make cows feed the cows feed and get milk. Make milk in a cheese combine watermelon and cheese in a watermelon salad in a salad bar. Some of these steps can take hours. Keep in mind these things when you're working on quests. Also note that there is a fault-tolerant one that prevents you from using your last crop. You will get one replacement if you accidentally use them all. However, it is not easy to create a stock back from a single crop (especially for those that take longer to grow), so please try to avoid this. Booty Farm Guide - Quests and interactions: with women's quests are the main way to earn gold in Booty Farm and a major source of experience. They are also how you get these sexy pictures of girls. Completing the quest will give you a certain amount of experience, gold, relationship points and one key for the bonus chest. (More on this later in the chests (No, not like that) section.) Gold is arguably the most important resource for keeping your farm running, but each resource is important in its own way. Keep in mind how long it takes to create what girls are asking for, and whether or not you think it's worth the price they offer. Selling a batch of 10 corn for 40 gold may not seem like a good deal, but corn is growing fast. Selling 3 salads for 180 gold when they take 2 hours or more to produce (each) suddenly doesn't seem that big. Completed quests take a few minutes to be delivered and then they will be replaced with a new one. You can also simply cancel quests and replace them in ten minutes. Minutes. be afraid to cancel the quest if it is not suitable. Once the quest is delivered, you will start a short conversation with the girl and the choice will be presented. The answer is correct and you get a tiny relationship bonus. Sometimes, you get a chance to learn a new fact and you can be quizzed on this woman later (a lot in HuniePop style). Finally, hitting a vehage will unlock one of those sexy photos you're probably chasing after; A short conversation will take place to progress the story before it gets unlocked. Booty Farm Guide - Photo Slots One of the main awards for quests sexy photos of girls. They often start to be quite innocent and gradually build up in how explicit they are. Unfortunately, one of the free game mechanics in the game is the restriction on your photo slots. You get 15 for free and then you have to buy more. Packages can be bought with a premium currency, but the recent change after launch allows you to buy one slot for 1000 gold. I think it would be wiser to accumulate gold and get the photo slots you want this way. The images aren't going anywhere, are they? You can of course fully spend some real money and buy slots this way, although I would argue your money is better invested in expanding and upgrading your farm (which we'll consider further in this Booty Farm guide in the Upgrade and Expansion section). Booty Farm Guide - Chests (No, not this kind) Like many free games, Booty Farm has chests that you can unlock. There are several ways to get them. No matter how you purchase them, the chests all seem to yield the same prey. The first (and most reliable way) to get chests is to fulfill orders. Completing five orders will give you enough keys to open the bonus chest (which is reset after a while). You will also get breasts every time you learn a new fact about girls through the visual new parts of the game. Chests are sometimes placed on farm extensions, too. Finally, you get your breasts for a few days in your daily entry bonus. Chests can contain gold, experience, premium currency and upgrade items. You should always strive to get more chests if you can so things will run more smoothly. Booty Farm Guide - Storage (and how to manage it) Storage management is probably the most important part of the game. You start with enough space and it's a pain in the butt to increase it, especially because each new level player adds a lot of things you can collect. Here's what to do. First, you should always focus on increasing your storage. Buy wooden boards, metal nails and hammers on the market (more in the Market section, unsurprisingly) at every opportunity. Upgrade whenever you can so you have more room to work. Keep in mind that every subsequent update cost more boards, nails and hammers than the previous one. Powerful advice is to consider buildings, animals and fields as a way of storing things for free. You don't need to harvest crops crops or pick up those eggs just yet, right? Take these products when you need them and save some space. I would advise you to keep no more than 4 or so finished products and about 10 or so of each crop. Things will be tough even with this system, but it's a good way to balance things in my opinion. This will become less of a hassle as you increase the size of the store. Booty Farm Guide - Market Market is a way to earn extra gold and reset the extra product. Ideally, any products you make should go to the girls to promote your game. However, you may encounter a situation where you have too many of any one things. If it's just one or two items, it's best to sell them at low prices to free up your limited market slots as soon as possible. It is possible, of course, to give profit to the market. Consider what it is that people will want to buy. I found a degree of success in selling watermelons and sunflowers because they last so long (2 hours and 4 hours, respectively). I always sell them in batches of ten in order to make the best use of my market slots. You can also buy things on the market. It's rare that prices are a lot, but it happens sometimes. I would advise you to focus on buying hammers, metal nails and wooden boards so you can upgrade your storage and increase your profit potential. All but this is a waste. Booty Farm Guide - Upgrade and expand you will earn premium currency just to play the game. One might be tempted to spend it on speeding things up, and I highly recommend against that. There are wiser ways to hold your shiny gems. The best and most obvious way to use your currency is to increase the queue size of your production buildings. The larger queue size means that you can have more goods produced, and that frees up important storage space. It will also help you make good use of your time; You have to sleep sometime, and a longer queue means that night production won't sit back for so long. I think this is the best way to use premium currency. You can buy hammers, metal nails and wooden boards for the price of 5 gems each. I think it's too much and not worth buying. Your money is better spent in such a way as to increase production, which increases your gold income and allows you to buy them from the gold market. Upgrading and expanding the farm is the surest way to make things go much faster. If the cost of premium currency advances these goals, do so. If not, hold on to him! Booty Farm Guide - The most important advice I can give is that storage is the biggest bottleneck in the game. If you take anything out of this Booty Farm guide, let it be one Your storage limit will frustrate you as you play through the game. You need to have a dedicated focus on making your store bigger at every opportunity. After you've played for weeks, you've hit the point where You don't actually need to buy storage parts anymore with gold. Then you can start unlocking the photos with gold and creating a nice piece of change. You can be well prepared for the next update at this point! Welp, that's all for our Booty Farm guide. Hopefully there are some tips here that you found helpful! I get a certain amount of fun trying to figure out free games, spending as little money as possible (and ideally not). I think I've managed to do it here, although waiting timers sure can be a pain sometimes. This is far from the worst example of free play I've seen. It's scratching Farmville itch in the very right way for me. If you like Booty Farm, consider sneaking Nutaku and developers a few bucks when you can. I certainly spent my money on less entertaining things! At this point, you can play Booty Farm for free on Nutaku's NSFW website.
